

Our Environmental Policy

Our organization is committed to conducting its activities with an environmentally conscious approach, prioritizing the conservation of natural resources, minimizing environmental impacts, and supporting a sustainable future. In this context:

- Efficient Use of Natural Resources:** Measures are taken to reduce the consumption of energy, water, and environmentally harmful substances, increase energy efficiency, and promote the use of renewable energy sources.
- Waste Management:** Solid, liquid, and gaseous waste generated during activities are minimized; opportunities for reuse and recycling are explored. Efforts are prioritized to prevent pollution at its source.
- Legal and Voluntary Commitments:** All legal requirements and other voluntarily undertaken obligations related to environmental protection are fully complied with. Beyond these obligations, the aim is to add value to the environment and set an example as a leading organization in the region.
- Training and Awareness:** Employees, guests, and the community are educated and made aware of environmental issues. Awareness is raised regarding water and energy conservation, prevention of environmental pollution, and reduction of resource waste.
- Collaboration and Supplier Selection:** Cooperation with relevant institutions and organizations is maintained to carry out initiatives that enhance the environment. Suppliers who share the same awareness and objectives are prioritized.
- Continuous Improvement:** The Environmental Management System is periodically reviewed and adapted to changing conditions, ensuring continuous improvement in environmental and production performance.
- Sustainability and Social Contribution:** Participation in voluntary projects is encouraged to contribute to the development of environmental awareness and improvement within society.

Our organization is committed to maintaining all these efforts transparently, making our environmental policy a way of life, and leaving a clean environment for future generations.
